

Document Summary TASK-1B08114D

Analysis & Generated Response

SMART INDIA HACKATHON 2026

- **Problem Statement ID:** SIH26117
- **Problem Statement Title:** "Sovereign On-Premise Agentic AI Workbench using Open-Weight Multimodal LLMs for Confidential Industrial Work"

Theme: Smart Automation

PS Category:

- Software
- Team ID:
- --

SOVEREIGN AI WORKBENCH

From Confidential Data -> Verified Action

1. Detailed Solution

- **Input:** PDF, Scan, Image, Drawing, Code -> Understand Local OCR + Vision.
- Retrieve Private SOPs / Manuals -> Plan Agent creates task plan.
- Execute Local models + tools -> Verify/Sandbox evidence, select best answer.

2. How It Addresses the Problem:

- Cloud AI blocked -> On-premise/Air-gapped AI
- Scanned + multimodal data -> Best local OCR + Vision model
- Different tasks/models -> Task-aware Model Router
- Multi-step work is manual -> Agent plans, acts, verifies.

3. Innovation & Uniqueness:

- **Provable Sovereignty:** No cloud dependency, no Internet access; controlled egress.
- **Task-Aware Routing:** Task -> best local model for each task.
- **Agentic Execution:** Plan -> tools -> iterate -> verify knowledge in internal docs.

4. Controlled Execution:

- **Sandboxed Code:** Sandbox + approval + audit
- **Model-agnostic:** New models plug into without redesigning the whole system

5. Evidence-Focused Work:

- **Model-Agnostic:** New models can be added later without redesign.
- **New Models Plug in Without Redesign:** No need to redesign entire systems.

6. Confidential Data -> Verified Action

- One sovereign workspace
- Agent plans, executes, verifies
- Local model selected per task
- Evidence + audit trail + deliverable
