

Document Summary TASK-CCF862E1

Analysis & Generated Response

- **Purpose & Standards:** The IT Security & Remote Work SOP defines mandatory security measures for 50+ Full-Time Staff operating across hybrid environments.
- **Hardware & Password Governance:**
 - All corporate laptops must run company-managed Endpoint Detection & Response (EDR) software and keep BitLocker/FileVault disk encryption enabled.
 - Authentication: Passwords are a minimum of 14 characters, stored using corporate password managers. Multi-Factor Authentication (MFA) is mandatory on all accounts (Google Workspace, GitHub, AWS).
- **Remote Work & Network Access SOP:**
 - Staff connecting from remote locations or public Wi-Fi must route all traffic through the official NexusTech WireGuard VPN.
 - Data Transfer Restrictions: Production datasets and customer Personal Identifiable Information (PII) cannot be downloaded onto personal devices or unencrypted USB drives.
 - Incident Response SOP: In case of a lost device or compromised credential, an employee should report to security@nexustech.com within 30 minutes. Security Audits are performed quarterly with non-compliant devices automatically losing network access.
- **NEXUSTECH SOLUTIONS INC. • OPERATIONS & GOVERNANCE:**
 - The company's operations and governance manual outlines confidentiality, integrity, availability, and accountability of its internal and external compliance.
 - Confidential Internal & External Compliance Manual: This document provides guidelines for maintaining the organization's confidential information.
 - **NexusTech Solutions Inc. — Confidential Internal & External Compliance Manual:** This section details the organization's policies on data protection, access control, and reporting mechanisms to ensure adherence to legal and regulatory requirements.
