

Document Summary TASK-FCB1134F

Analysis & Generated Response

- **Title:** Sovereign On-Premise Agentic AI Workbench using Open-Weight Multimodal LLMs for Confidential Industrial Work
- **Problem Statement ID:** SIH26117
- **Problem:** The current approach to industrial work involves centralized AI systems that are vulnerable to cloud and internet-based attacks.
- **Theme:** Smart Automation
- **PS Category:** Software
- **Team ID:**
- **Team Name:** TEAM ADRESTIA
- **Team Members:**
- **Adrestia:** A team of experts in artificial intelligence, machine learning, and software development focused on creating a secure, scalable, and autonomous AI platform for confidential industrial work.
- **SOVEREIGN AI WORKBENCH:**
- The Sovereign AI Workbench aims to address the challenges associated with centralized AI systems by providing an open-source, locally deployed solution that can be easily scaled up or down based on specific needs.
- **From Confidential Data -> Verified Action:**
- This process involves scanning and visualizing confidential data from various sources.
- **1. DETAILED SOLUTION:**
- The detailed solution includes the following components:
- **Local OCR + Vision:** Utilizes local optical character recognition (OCR) and computer vision models to extract relevant information from scanned documents.
- **Private SOPs / Manuals:** Retrieves private source documentation, manuals, and other technical specifications for each task.
- **RETRIEVE:**
- The retrieval process involves:
- **Private RAG + Source Grounding:** Uses a Private Research and Analysis Group (RAG) to gather detailed information from the sources.
- **PLAN:**
- The plan includes:
- **Agent Creation:** Plans for creating tasks, tools, and verifying actions.
- **EXECUTE:**
- Execution involves:

- **Local Models + Tools:** Uses local models and tools provided by the team to execute each task.
- **VERIFY/ RERANK:**
 - Verification includes:
 - **Sandbox + Evidence Selection:** Selects evidence for verification based on its relevance.
- **DELIVER:**
 - Deliverables include:
 - **Word, Excel, PPT, Code, Text**
- **2. HOW IT ADDRESSES THE PROBLEM:**
 - The Sovereign AI Workbench addresses the problem by providing a secure and scalable solution that can be easily deployed in
